

TruVision Mac Safari Browser Plug-in v3.0 Quick Start Guide

P/N 1073439-EN • REV A • ISS 31JAN18

Overview

For TruVision recorder browser functionality in Mac Safari browsers a plug-in must be installed.

System requirements

- Mac OS > 10.8
- Safari > 8.0 .5

Supported recorders

- TVN 11
- TVN 71

Plug-in installation

1. Download the TruVision Mac Safari Browser Plug-In v3.0 file from our website:

Go to the Interlogix.com website. Navigate from the home page by clicking **Video > Recorders**. Select your recorder. Click the **Downloads** link. Scroll down to Software and click the download link.

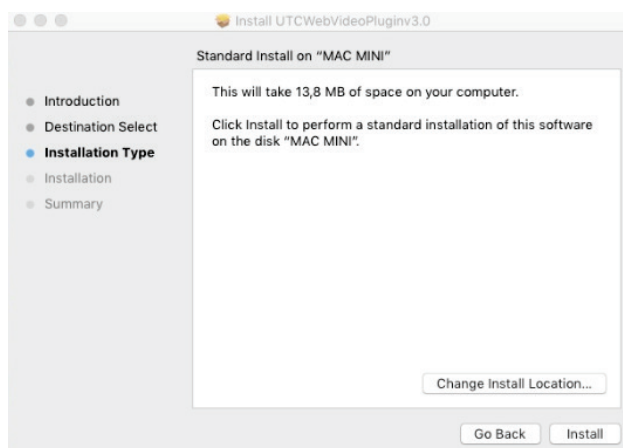

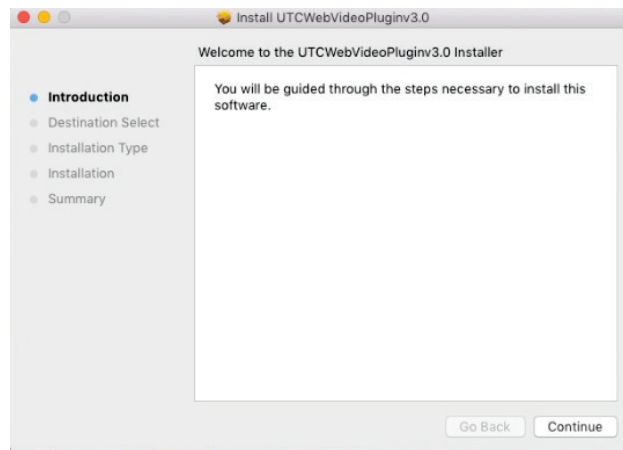

For EMEA:

Go the firesecurityproducts.com website. Navigate from the home page by clicking **Products > Recorders** (in the Video & Transmission section). Select your recorder and on its webpage click **Downloads**. There you will find the Mac Safari plugin. Click it to download.

2. Unzip the *UTCWebVideoPlugin.zip* file and extract the pkg file to your desktop.

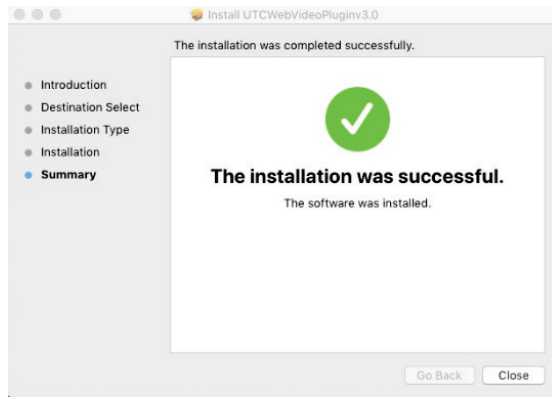

3. Open the file by clicking Open.
4. Follow the installation instructions provided.

5. Enter the Username and Password of the Mac when requested.

6. After a successful installation, close the installation dialog window.

7. Open Safari and connect to any supported device.

Bug fixes in this version

- High resolution streams will be shown without shaking/flickering
- Intelligent information of VCA events can be seen on the live view page.
- Drawing a motion detection zone will be saved and motion will be detected in the dedicated zone(s).

Known limitations

- Text In is not supported in this version.
- The player download does not work for Mac. The player needs to be downloaded from the recorder directly via a USB stick.
