

TruVision TVR 15HD Firmware

2.1 Release Notes

P/N 1073674-EN • REV A • ISS 02AUG19

Introduction

This is the TruVision TVR 15HD Firmware 2.1 Release Notes document with additional information not covered in the user manual. For the latest information on the TruVision DVR 15HD (TVR 15HD), please visit:

Americas: www.interlogix.com/videoupgrades

EMEA: www.firesecurityproducts.com

Australia: www.interlogix.com.au

Overview

The TVR 15HD is a full hybrid recorder that can work with standard analog, HD-TVI and IP cameras. The TVR 15HD also features the signature built-in TruVision intrusion integration functionality. Firmware 2.1 contains enhancements and bug fixes.

New features/Enhancements

- An informative text was added to inform users on setting up the *Advanced Motion Detection* function in the cameras
- Thumbnail function: the thumbnail function, available in TruVision Navigator 8.0SP2, is supported by the TVR 15HD. This enables a quicker search for recorded incidents.
- An updated digital signature is added for the ActiveX web plugin
- Support for two extra SIA/XSIA codes for zone events for the intrusion panel reporting. The extra codes that are supported are:
 - BV: intrusion alarm verified
 - HV: hold-up verified

When these codes are reported by the panel to the recorder for a zone, they will also trigger the actions that are setup for this zone.

Bug fixes

- A bug was fixed for TVI PTZ camera control that occurred when the camera was rebooted when it was connected to the TVR 15HD.

Contacting support

For help installing, operating, maintaining, and troubleshooting this product, refer to this document and any other documentation provided. If you still have questions, contact us during business hours (Monday through Friday, excluding holidays).

Note: Please be ready at the equipment before calling.
