

TruVision NVR 71 Firmware 1.5 Release Notes

P/N 1113-EN • REV A • ISS 13OCT22

Introduction

This is the TruVision NVR 71 Firmware 1.5 Release Notes document with additional information not covered in the user manual. For the latest information on the TruVision NVR 71 (TVN 71), please visit:

EMEA: <https://firesecurityproducts.com>

Australia: <https://firesecurityproducts.com.au>

Overview

The TVN 71 series is a Network Video Recorder with an incoming bandwidth of 576 Mbps and capable of connecting up to a maximum of 128 cameras. The recorder is available in a RAID and non-RAID configuration.

Enhancements

- The security for the user passwords has increased: passwords need to have a higher complexity and number of allowed attempts has been reduced to three before the recorder access is locked for 30 minutes (web mode).
- The player that can be exported from the recorder was updated to support the recent released TruVision IP cameras.
- The alarm output behavior for Disable Actions can be defined.
- TLS v1.2 is now supported when sending emails via the recorder.
- Cybersecurity updates
- The snapshot resolution for snapshots that are sent via the email function has been increased to 4CIF resolution.
- Support for new TruVision M/P IP PTZ cameras

Bug fixes

- An issue was fixed with the VCA recording color legend shown in the playback timeline for the TruVision Series 6 IP cameras on certain camera channels (1, 33 and 65) for systems that have more than 33 cameras.
- An issue was fixed for the receiving time of ANPR events from ANPR cameras when the recorder was using firmware version 1.4.

Contacting support

For help installing, operating, maintaining, and troubleshooting this product, refer to this document and any other documentation provided. If you still have questions, contact us during business hours (Monday through Friday, excluding holidays).

Note: Please be ready at the equipment before calling.
