

Discover the Next Evolution of  
Tecom Management Software

# WMS Pro

## Web Management System

WMS Pro is the next step in management software, providing a seamless and modern solution for both the integrator and end user.

Designed and developed in Australia, for Australian and global markets.

WMS Pro Security Solutions

# Flexible, Scalable, Intuitive

WMS Pro is the latest software suite from Aritech, built from the ground up to work hand-in-hand with your Tecom security and access control systems. WMS Pro has been designed to improve safety and increase efficiency, while adding value to any installation, no matter the size.

## Alarm Management

Easily manage alarms on your system, with customisable options for both visual and auditory indicators.

## Dark Mode

An Operator display setting within WMS Pro which provides a darker display theme, compliant with modern-day Web Content Accessibility Guidelines.

## Widget Based Dashboard

Easily customise your user interface to suit an individual clients needs, displaying only the information and data they require with a fully configurable and responsive dashboard.

## Wizards & Tools

Intuitive guides, improved processes and the ability to retrieve an entire configured system without the need for any additional work, allow systems to be configured and live in minimal time, saving you time and money.

## Control Connected Devices

Advanced manual control of physical and digital devices across 100s of panels and sites.

## Device and Software History Logs

WMS Pro's advanced filtering allows for quick and easy identification of relevant information across the entire system. History logs can be viewed directly and exported to common formats.

## Flexible Access Rights

You can assign rights per controller using existing alarm/door/floor groups right through to Unified Access Groups (UAGs) spanning multiple controllers/sites.

## Card and Credential Management

Full management of card holders and their access rights across multi-panel systems, intelligently merging users/cardholders across systems as well as integrated smart card programmer functionality.

## CTPlus Integration

Tecom CTPlus connects directly to WMS Pro, sharing the same database and comm path. Changes are saved and visible in both WMS Pro and the hardware immediately. Current panel programming is loaded the moment you connect, with no need to manually retrieve, send, import or export between different CTPlus installations.

## Cyber Secure

WMS Pro complies to all the latest IT Industry best practices and cyber security requirements, empowering users to leverage the very latest computer hardware and virtual environments.
