

## Market Release Note

MRN-TS9002-351-B26

---

Product number: TS9002

Product description: Titan 3.5.1

Product version: TS9002-R03.05.01 Build 26

Affected parts: TS9002

Release date: 9<sup>th</sup> October 2018

---

Interlogix is pleased to announce the immediate availability of Titan 3.5.1, Build 26.

### New features

- Improved security for comms paths, which can now be configured as either the existing 10-digit security password, or a username/password (requires Challenger firmware V10-06.19251)

### Improvements

- APN Username (for 3G Communications Module) has been extended to a maximum of 40 characters (Requires TS1053 firmware V01-01-19283)

### Issues resolved in this release

- Resolved issue during V8 to Challenger10 migration which could result in the conversion failing if Alarm Groups were improperly configured
- Improved firmware device and location checks on the firmware update form

## Documentation

## Known issues

- When multiple panels are connected using multi-drop on a single serial port, there may be times that only the first Challenger panel communicates. If this should occur, go to Control > Challenger Version No, then recall the version for all panels. This will prompt the panels to communicate correctly.
- It is not possible to convert a Challenger10 with V8 input numbering to use standard Challenger10 input numbering, and vice-versa.
