

In touch and in control

Providing you with the simplicity, connectivity and security you need.

**The smart system
that keeps you in touch
and in control.**

Peace of mind

at home or at work

Efficient & Cost effective solution

The Reliance XR Series – the natural successor for NetworX – is one of the most powerful panels currently available in the market. Whether it is for new installations or upgrading an existing NetworX panel, the Reliance XR Series will bring new technology and additional features. Existing NetworX systems can easily migrate to the new Reliance XR Series without the need to replace the already installed keypads and auxiliary modules, such as the zone- and output expanders. This migration is made possible by the dual bus (NetworX and RS-485) present on-board the Reliance XR Series.

Smart

Empowered by UltraSync connectivity and the UltraSync+ mobile app, the Reliance XR Series provides you with the flexibility and freedom to adapt your security system to your own lifestyle or your own business.

Secure

The UltraSync+ mobile App allows you to control your Reliance XR Series system from virtually anywhere and in the most secure manner, using end-2-end encrypted communication.

25 years iconic experience

The iconic NetworX series of security panels are renowned for their functionality and user-friendly operation. For more than 25 years, they have set the standard for a reliable, cost-effective and user-friendly security solution. The Reliance XR Series - the next generation of security panels – not only maintains this strong heritage, but also adds a host of new technology to create one of the most powerful panels currently available in the market.

UltraSync+ mobile App

Integration of up to 16 cameras is possible.

The UltraSync portal lets you control, configure and diagnose your system from virtually anywhere in the world. This allows you to save a lot of time by reducing the number of on-site visits.

Simply efficient and user friendly

Familiar

The Reliance XR Series boards have the same form factor as the NetworX ones and come with a dual bus on board, making them backwards compatible with almost all NetworX auxiliary equipment, such as keypads and zone expanders. Therefore, the Reliance XR Series is **the most cost-effective solution to upgrade a legacy NetworX system** to a future proof and state-of-the-art installation.

Flexible

The Reliance XR Series is a flexible hybrid solution and supports a wide range of wired and wireless intrusion detectors (door/window, shock, motion sensors) as well as life safety sensors (24 hour medical or hold-up buttons, smoke/heat sensors, flood or freeze).

As part of the UltraSync family of products, the Reliance XR Series offer solutions for existing as well as new customers. Reliance XR Series offers a new standard for scalability, flexibility and retrofit installations. Reliance XR Series is the natural successor of the iconic NetworX panel series, enabling professional security installers to leverage a single platform for new installs as well as upgrading legacy NetworX installations with the latest technologies and home comfort.

Scalable

With the ability to control from 4 up to 192 zones, from 4 to 8 partitions and this by 100 up to 256 users, the Reliance XR Series has the flexibility to meet the requirements for small to mid-sized security needs.

OVERVIEW

Check your system status, arm/disarm and trigger automatic actions from virtually anywhere.

SENSORS

View the status of security and life safety sensors, and receive specific alerts.

EVENT HISTORY

View your system history to stay aware of comings and goings, troubles and alarms.

USER MANAGEMENT

Add and remove users, update profiles and create temporary codes.

PUSH NOTIFICATION

Receive text alerts on your smart devices.

GEOLOCATION

Set a virtual perimeter around your home that can be used to trigger scenes.

AND MANY MORE...

For a range of applications, please check the supplementary brochures.

Wide range of sensors

- Motion sensors
- Door window sensors
- Flood sensors
- Smoke - Heat Sensors
- In and outdoor siren
- Keyfob
- Panic alarm wristwatch/pendant

Smart control

from anywhere

Ideal for you and your family, UltraSync™ brings smart, cost-effective security and lifestyle management into your home and at your fingertips. Reliable and convenient, UltraSync connectivity lets you synchronise your home systems with your day-to-day activities and create customised scenarios so that your home responds to your unique schedule.

Secure your building and assets

Affordable and convenient, the Reliance XR Series keeps your home protected or business.

Enhanced security. More convenience

Use the Reliance XR Series mobile app to create temporary codes for people who need limited access to your home. If, for example, you need to let a friend or worker into your home, you can use the app to create a unique code, and then remotely set the system to allow access only on selected days and at specific times.

Encrypted communication

UltraSync connectivity allows you to control your security system from virtually anywhere. But above all, UltraSync ensures that your connectivity is secured at all times, using an end-2-end encrypted communication with VPN technology. With the increasing of Cyber Security threats protecting your home and belongings becomes a priority.

Reliable, proven system

Our smart home solution is built on well-established technology and has been thoroughly field tested. Via UltraSync connectivity, the Reliance XR Series offers a host of new and reliable services.

Data privacy

UltraSync has been designed and built in accordance with the Privacy by Design principles, taking into account data protection obligations to enable compliance with data privacy requirements. Apart from the data we store safely and securely on behalf of our customers, the secured connection offered by UltraSync does not involve any transfer of data between local devices and remote applications.

Future ready

UltraSync connectivity lets you add on smart-enabled devices without having to upgrade your whole system. You can then choreograph all the devices to work together to respond to your lifestyle needs and energy requirements.
